

MJR-8500 EURO Calculating Time Recorder

Designed as an 'intelligent' stand alone Time Recorder, the robust MJR-8500 EURO can be programmed to compare an individual's time recordings with your organisation's standard work-time structure, to highlight deviations and assist wage calculations.

As an 'intelligent' Time Recorder the MJR-850 EURO logs the day and employee IN / OUT times. It provides the ability to report on deviations from standard working practices, including lateness, early departure or overtime and automatically calculates actual wage totals. With the capacity to programme up to 4 different shift patterns the MJR-8500 EURO allows you to manage multiple work patterns simply from one single system.

Employee clocking details are printed vertically onto a coded clock cards ensuring the undisputed monitoring of staff timings and calculation of wages.

Robust enough to suit commercial and industrial environments yet still attractive in any office, the MJR-8500 EURO is ideal for companies with a maximum of **200** employees that do not require a computerised system.

Features:

- Unlimited consecutive IN/OUT time prints
- Automatic deduction of break times
- Suitable for up to 4 different shifts
- Can be programmed for standard holiday periods
- Year retention of employee and program data during power failure
- Pre-programmed for BST/GMT time change
